Document type	Error catalogue / troubleshooting reference
Coverage	Order, file upload, claim, access, and general technical errors

Contents

1. Order-Related Errors
 - 1.1 Credit limit exceeded
 - 1.2 Part number not found
 - 1.3 Requested quantity exceeds available stock
 - 1.4 Order submission failed, please try again
 - 1.5 Invalid delivery address
2. File Upload Errors
 - 2.1 Invalid file format
 - 2.2 File exceeds maximum size
 - 2.3 Invalid part number on row [number]
 - 2.4 Invalid quantity on row [number]
 - 2.5 Duplicate part number detected
3. Claim-Related Errors
 - 3.1 Order reference not found
 - 3.2 Claim quantity exceeds purchased quantity
 - 3.3 Part is outside warranty period
 - 3.4 Return window is not currently open
 - 3.5 Maximum return value exceeded
4. Login and Access Errors
 - 4.1 Invalid username or password
 - 4.2 Account is locked
 - 4.3 Session has expired, please log in again
 - 4.4 You do not have permission to access this feature
5. General Technical Errors
 - 5.1 Service temporarily unavailable
 - 5.2 Connection timeout
 - 5.3 An unexpected error has occurred

1. Order-Related Errors

1.1 Credit limit exceeded

This message appears when the total value of the order being placed exceeds the available credit on the dealer account. The user can reduce the order quantity, pay outstanding balance, or contact the account manager to discuss a credit limit increase.

1.2 Part number not found

This message appears when the part number entered does not match a catalog entry. The user should verify the part number from technical documentation and contact support if it is confirmed correct but still not found.

1.3 Requested quantity exceeds available stock

This message appears when the entered quantity is greater than available warehouse quantity. The user can order available stock and accept backlog, or reduce the quantity.

1.4 Order submission failed, please try again

This general error indicates the order could not be submitted due to a technical issue. The user should retry after a short interval and contact support if the error persists.

1.5 Invalid delivery address

This message appears when the selected or entered delivery address is incomplete or invalid. The user should check required address fields or contact the administrator to update the default address.

2. File Upload Errors

2.1 Invalid file format

The uploaded file is not in the expected CSV format. The user should save the file as a UTF-8 CSV and upload again.

2.2 File exceeds maximum size

The file is larger than the maximum allowed size. The user should split it into smaller files and upload separately.

2.3 Invalid part number on row [number]

A part number in the specified row is not recognised. The user should correct the part number before re-uploading.

2.4 Invalid quantity on row [number]

The quantity in the specified row is not a positive whole number. The user should correct the quantity and re-upload.

2.5 Duplicate part number detected

The same part number appears more than once. The user should combine quantities into one row or place separate orders.

3. Claim-Related Errors

3.1 Order reference not found

The order or delivery reference number does not match a system record. The user should verify the number and contact support if it is correct.

3.2 Claim quantity exceeds purchased quantity

The claimed quantity is greater than the original purchased quantity. The user should reduce the claim quantity.

3.3 Part is outside warranty period

The failure date is after the end of the warranty period. The user should verify dates and contact claims support if exceptional circumstances apply.

3.4 Return window is not currently open

The user is trying to access return submission outside the open return window. Portal notifications should be checked for the next window.

3.5 Maximum return value exceeded

The selected return value exceeds the maximum returnable value. The user must reduce quantities until the total is within the allowed limit.

4. Login and Access Errors

4.1 Invalid username or password

The entered credentials do not match an active account. The user should check credentials or use the forgotten password function.

4.2 Account is locked

The account has been locked due to multiple failed login attempts. It may unlock automatically, or an administrator can unlock it.

4.3 Session has expired, please log in again

The user session timed out due to inactivity. The user should log in again and save work regularly.

4.4 You do not have permission to access this feature

The user role does not have permission for the requested feature. The user should contact the administrator if access is expected.

5. General Technical Errors

5.1 Service temporarily unavailable

The portal or a backend service is temporarily unavailable. The user should retry later and contact support if it remains unavailable.

5.2 Connection timeout

The portal cannot reach a required service within the expected time. The user should check connectivity and retry.

5.3 An unexpected error has occurred

A general unanticipated error occurred. The user should note the time, screen, and steps taken before contacting support.
