Frequently Asked Questions - Automotive Parts Ordering Portal

Disclaimer

This is a sample document prepared for reference and review purposes only. The content should be validated and approved by the appropriate business, legal, compliance, and operational stakeholders before being used as an official policy document.

Document type	FAQ reference document
Coverage	Orders, deliveries, claims, billing, account and access

Contents

1. Orders

- 1.1 How do I place a spare parts order?
- 1.2 Why was my order blocked at checkout?
- 1.3 Can I change or cancel an order after it has been submitted?
- 1.4 How do I find a part if I do not know the part number?
- 1.5 What does it mean when a part shows as superseded?
- 1.6 Why is a part showing as out of stock?
- 1.7 What happens to the parts I ordered that were not in stock?

2. Deliveries

- 2.1 How do I track my delivery?
- 2.2 My expected delivery date has passed but the order has not arrived. What should I do?
- 2.3 I received my order but some items are missing. What should I do?
- 2.4 What should I do if my delivery arrives damaged?

3. Claims

- 3.1 How long does it take to process a claim?
- 3.2 My claim has been in under review status for a long time. What should I do?
- 3.3 Why was my claim rejected?
- 3.4 Can I resubmit a rejected claim?
- 3.5 When does the quarterly return window open?

4. Billing

- 4.1 Where can I find my invoices?
- 4.2 Why have I received an invoice for parts I have not yet received?
- 4.3 How are credit notes applied to my account?

5. Account and Access

- 5.1 How do I request access to the portal?
- 5.2 I have forgotten my password. How do I reset it?
- 5.3 Why can I not see certain features in the portal?

1. Orders

1.1 How do I place a spare parts order?

Log into the portal, open the Order Input section, search for parts by part number or description, add quantities to the basket, review the order summary, and confirm the order. An order reference number is provided after successful submission.

1.2 Why was my order blocked at checkout?

The most common reason is that the order value exceeds available credit. The user can reduce the quantity, contact the account manager for credit limit review, or discuss a payment arrangement.

1.3 Can I change or cancel an order after it has been submitted?

Orders can be changed or cancelled only before warehouse picking starts. Contact support promptly with the order reference number.

1.4 How do I find a part if I do not know the part number?

Search with descriptive keywords in Order Input or Parts List and use category filters. If the part cannot be found, contact technical support.

1.5 What does it mean when a part shows as superseded?

A superseded part has been replaced by a newer version. The catalog displays the replacement part number, which should be ordered instead.

1.6 Why is a part showing as out of stock?

A part may be out of stock due to high demand, supplier delays, or production issues. Check expected restocking date or alternative warehouse availability.

1.7 What happens to the parts I ordered that were not in stock?

Unavailable parts are placed on backlog and dispatched when stock becomes available. Backlog items can be monitored in the Delivery Backlog screen.

2. Deliveries

2.1 How do I track my delivery?

Use Order Tracking or Delivery Status and search by order reference number. The delivery status and carrier tracking reference are shown when available.

2.2 My expected delivery date has passed but the order has not arrived. What should I do?

Check the carrier tracking information first. If the carrier shows a problem, contact the carrier; if it shows delivered but not received, contact support with the order reference number.

2.3 I received my order but some items are missing. What should I do?

Raise a quantity discrepancy claim through Claim Declaration with delivery reference, part numbers, and missing quantities.

2.4 What should I do if my delivery arrives damaged?

Raise a damage claim through Claim Declaration and include photographs of damaged packaging and parts as supporting evidence.

3. Claims

3.1 How long does it take to process a claim?

Processing times are defined in the relevant service level agreement. Warranty claims normally require more investigation than damage or quantity discrepancy claims.

3.2 My claim has been in under review status for a long time. What should I do?

Contact claims support with the claim reference number so the team can check status and provide an update.

3.3 Why was my claim rejected?

The rejection reason is recorded in the claim detail view. Common reasons include expired warranty, non-eligible defect, insufficient documentation, or late submission.

3.4 Can I resubmit a rejected claim?

Resubmission depends on the rejection reason. Missing documentation may allow resubmission, while expired warranty may not unless exceptional circumstances apply.

3.5 When does the quarterly return window open?

The quarterly return window opens at the end of each quarter. Portal and email notifications include the closing date and maximum returnable value.

4. Billing

4.1 Where can I find my invoices?

Invoices are available in the Billing List screen and can be searched by invoice number, date range, or order reference, then downloaded as PDF.

4.2 Why have I received an invoice for parts I have not yet received?

Invoices are generated when deliveries are confirmed. If parts were not received despite confirmation, raise a quantity discrepancy claim.

4.3 How are credit notes applied to my account?

Credit notes are applied against the next invoice. Remaining credit is carried forward if the credit note exceeds the next invoice value.

5. Account and Access

5.1 How do I request access to the portal?

Access is managed by the organisation administrator, who creates the account and assigns permissions based on the user role.

5.2 I have forgotten my password. How do I reset it?

Use the forgotten password link on the portal login screen, enter the registered email address, and follow the reset link received by email.

5.3 Why can I not see certain features in the portal?

Feature visibility is controlled by user role and permissions. Contact the administrator to review account permissions if access is expected.
